Chapter 123: The Assistants of the Divine Butlers

To further enhance the efficiency and functionality of their castles, the Divine Triad instructed their butlers to create three assistants each. These assistants, like the butlers themselves, were molded from the essence of their creators' powers—light, black soil, and molten lava. Though subordinate to the butlers, the assistants were imbued with unique abilities to handle specialized tasks, ensuring the castles operated with unmatched precision and grandeur.

Fortify barriers and keep the castles prepared for potential threats.
